Allocation Templates – These are created within the Personal Settings*. These templates are a collection of asset classes and can be linked to a risk category.

The Allocation Template denoted with the asterisk is the template that matches the clients attitude to risk chosen for the client within client details. Any template can be chosen from this selection.

Available Assets – This option will list the asset classes available. Asset classes can be managed and grouped in Personal Settings*.

If Unlink Template is shown, editing will not be enabled on the template. Should a user wish to edit a chosen template for a particular case, click Unlink Template.

*Please see the Asset Reviewer Personal Settings User Guide for further information.

Remuneration

Remuneration to be applied – Select No if remuneration is not to be taken. Select Yes to add remuneration.

Remuneration to be applied Yes No

Subject to product criteria being met, all providers' products will be included. Each product will have the providers' standard charges applied plus the specified level of remuneration. All remuneration taken from within the product (i.e. not a personal payment by the client) is on a 1:1 basis.

Please be aware that not all Providers may be able to support the style of remuneration selected.

In all cases, where remuneration has been selected, you will have the ability to include in the report results based on nil remuneration being selected within the analysis.

Existing Plan - Some provider's charges may be subject to a large fund discount. Where a proposed plan is identified as an 'Existing Plan', the effect of the total fund may reduce the

charge applied to the proposed new investment. There may also be setup or annual fees that are waived. The system will take an 'Existing Plan' into consideration and reflect the charges accordingly.

Results Summary

When the analysis has run, the products selected for the analysis will be listed. The highest value, based on the mid growth rate, will be at the top. Where the mid growth rate is unavailable results will be ranked by the low growth rate. The RIY (reduction in yield) will also be shown.

The illustration above shows the new investments and the potential tax implications associated with each investment result. Against each product chosen for the analysis, details of tax will be shown. Net – This is the fund value net of the tax calculated. Tax on Fund – Details the amount of tax calculated for the investment. Tax on Income – If an income is being taken from the investment, potential tax implications will show here.

Bespoking Options

A plan may be ‘bespoke’ on the results page to change a % AMC or a monetary charge if it differs to that held on the system. This may be used to reflect a GPP or to include a fund charge where funds have not been chosen. Adjustments can be made by clicking on 

Example

In the example below a 0.2% adjustment has been applied. In order to bespoke the results, use the information below to assist with completing the relevant fields.

Once the adjustments have been entered click the Recalculate button at the bottom of the page. The revised results will be shown and highlighted accordingly.

Adjust AMC	- ▼	0.2	%	Fund Splits							
Lump Sum	+ ▼	<input type="text"/>		Once only ▼							
	+ ▼	<input type="text"/>		Once only ▼							

	Description
Adjust Allocation	A positive value will enhance the fund. A negative value will reduce the fund to create an additional charge/fee.
Adjust AMC	Select positive to increase the AMC to add an additional charge/fee. A negative will reduce the AMC e.g. if the standard AMC is 0.9% an adjustment of - 0.2% will make the charge 0.7%
Lump Sum	Select positive to enhance the fund IE a credit. A negative will create a charge.
Fund Splits	The fund splits option can be used when the system has been run on default settings. You are able to enter the Name, Split and AMC of the fund to be used. This will override the default fund used.

Recommendations & Print Options

Two report options are available:

1. Select the recommended plan by using the tick box to the right of the projections; this will include plan charges, a year on year analysis, fund performance and Morningstar fact sheets.
2. If a plan has not been selected, the report will output the ranking table only.

Additional text can be added to the report by clicking on **Include Recommendations**. Suitability or Reasons Why letters can be pasted into this section to make the transfer report complete. To proceed to the report click on **Print Options**.

Print Options

The Additional Notes box allows for free text, which will appear in the report along with the selected product charges. If an adjustment has been made to a product charge in the bespoking option, a reason for the change should be recorded here.

The **Analysis Label** is optional. Any text entered here will appear on the report cover. This label can be used to identify a report when different versions have been produced.
